

Howdy Partner " FRESH AIR fi

**The Concept**  
 Forager is the culmination of a deep love for display fonts, nature, and psychedelic rock. Forager originally started off as lettering for an art project, but now it has evolved into something completely new! Forager combines the design aesthetics of the 70s, the flow of Art Nouveau, and the simplicity of sans serifs into an overlapping typeface.

**FORAGER**

 OVERLAPTYPE.COM

**OVERVIEW**  
 Forager is a sans serif typeface used for headlines, gig posters, and cool graphics. Its bowed verticals and flat horizontals create a rounded square shape which helps improve legibility when overlapped. The family consists of five weights in both overlap and tightly spaced styles, and includes two variable fonts.
